

Polaroid Sun 600 LMS Lens Replacement

Written By: Ian Hosek

INTRODUCTION

Replacing a broken or scratched lens on a Polaroid Sun 600 LMS.

TOOLS:

- [iFixit Opening Tools](#) (1)
- [Spudger](#) (1)

PARTS:

- [Replacement Lens](#) (1)
-

Step 1 — Lens

- Move film door slide on the left side of camera forward.
- Pull film door open.

Step 2

- Open the flash assembly by holding the sides of the top piece of the camera and pushing up gently until it snaps into place.

i If your camera is old or dirty, it may take more force to open the flash assembly.

Step 3

- Use a spudger on each side to separate the flash segment from the main body.

⚠ Be careful not to do this too hard because you may pull out the connecting wires.

Step 4

- Use several plastic opening tools around the edges of the camera's body to separate it from the plastic frame.

Step 5

- Place left hand on the gray section and right hand on the black section.
- Pull the sections apart.

Step 6

- Carefully remove the damaged lens from the interior of the camera.
- Replace with a new lens.

To reassemble your device, follow these instructions in reverse order.
